While searching the Japanese net for nuances of **Kazahana**, one very cuore doll named 風花 Kazahana popped up:

The Japanese doll masters amaze me endlessly, this beauty is made by 'Rose Moon' figurine workshop. Thus far I found that "Kazahana" means literally "snowflake", while ISO8 (the train enthusiast from Japan) gives another meaning: the phenomenon of snowflaking in a sunny day. As I see it is used to denote **purity**, or as **SOED** defines it: *The state of being morally or spiritually pure; freedom from moral or ritual pollution; chastity; an instance of this. ME.*

What are you waiting on?
