```
Example1:
look_down_on_us
look_down_$$$$_us@
F6,Enter
Example2:
*_look_down_*
look^^^_down_*
F6,Enter

Note1: If you are not going to use wildcards at all then
       the pattern must be equal to the whole(not partial match) line.
Note2: Seven wildcards are available:
       wildcard '*' any character(s) or empty,
       wildcard '@'/'#' any character {or empty}/{and not empty},
       wildcard '^'/'$' any ALPHA character {or empty}/{and not empty},
       wildcard '|'/'%' any NON-ALPHA character {or empty}/{and not empty}.
Note3: Due to different line endings(CRLF in Windows; LF in UNIX)
       you must add a '@' wildcard in place of CR:
       for example in case of searching for '*.pdf' write '*.pdf@', our files
       need the '@' wildcard they are in Windows format.
Note4: In Example1 '$$$$' allows 'onto' or 'upon' to emerge.
Note5: In Example2 '^^^' allows 's' or 'ed' or 'ing' to emerge.

Enter your pattern(s) one at a line, to start searching press 'F6' release and then 'Enter':
look^^^_down_*
^Z
